

## production lead times update

May 11, 2020

As we continue to ramp up capacity at our plant in Rosarito, MX, we wanted to provide an update on our lead times:

- Orders with estimated ship dates (ESDs) through May 22<sup>nd</sup> may be up to 10 days late
- ESDs on new orders are accurate

We are shipping product daily and actively working down our order backlog. It is our intention to re-start our biweekly lead time communications the first week of June.

Should you have questions on a specific order, please contact our customer service team.

We thank you for your continued patience and support throughout this COVID-19 situation.
