

## production lead times report

May 29, 2020

As you are aware, our plant re-opened up earlier this month and has been gradually ramping up staffing and production. We have been working overtime and will continue to do so in order to reduce the order backlog and improve lead times. We have implemented many safety measures to keep our employees safe and healthy while producing your blinds and shades. We thank you for your support and patience.

Below, please find our current projected lead times report.
